student friendly + real-world application

Unit: Volume
Student Handout 4

Name _____
Date _____ Pd _____

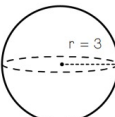

VOLUME OF SPHERES

VOLUME OF SPHERES

- A sphere is a three-dimensional figure where every point on its surface is the same distance from its _____.
- The formula for the volume of a sphere is _____, or _____.
- Half of a sphere is _____.

Use the formula above to find the volume of the sphere to the nearest hundredth.

1

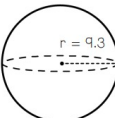

FORMULA: _____

PLUG IN VALUES: _____

IN TERMS OF PI: _____

NEAREST HUNDREDTH: _____

3

FORMULA: _____

PLUG IN VALUES: _____

IN TERMS OF PI: _____

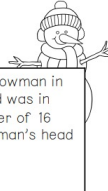

NEAREST HUNDREDTH: _____

scaffolded concepts

Use the formula for the volume of spheres to help you answer each question below.

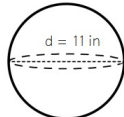

5. A hemisphere has a radius of 7 inches. Find the volume of the hemisphere to the nearest tenth.

6. Gabriel and his brothers built a snowman in their backyard. The snowman's head was in the shape of a sphere with a diameter of 16 inches. Find the volume of the snowman's head to the nearest tenth.

7. A sphere has a volume of 288π in³. Find the radius of the sphere.

9. Zola solved a question on her math test. She found the volume of a sphere below in terms of π . Explain Zola's error.

10. A sphere, cylinder, and cone all have a radius equal to the diameter of the sphere. Let V be the volume of the sphere.

- The area of the cylinder's base is _____.
- I can find the volume of the cylinder. It is _____.
- The volume of the sphere is _____.

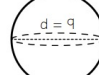

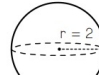

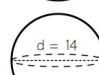

Summarize today's lesson:

Unit: Volume
Homework 4

Name _____
Date _____ Pd _____

VOLUME OF SPHERES

In 1-4, draw a line connecting each sphere to its volume in terms of π , then to the volume rounded to the nearest tenth. Not all choices will be used.

SPHERE	VOLUME (IN TERMS OF π)	VOLUME (NEAREST TENTH)
1. 	457.3π units ³	3,053.6 units ³
2. 	121.5π units ³	67 units ³
3. 	21.3π units ³	33.5 units ³
4. 	10.5π units ³	381.7 units ³
	972π units ³	10,052.2 units ³
	$3,201.3\pi$ units ³	1,436.8 units ³

5. Find the volume of a hemisphere that has a radius of 8 centimeters to the nearest tenth.

6. A magic 8-ball has a diameter of 5 inches. It is filled 85% full with blue water. How much space is occupied by the water? Round to the nearest tenth.

7. A sphere has a volume of 36π in³. Find the radius of the sphere. Use 3.14 for π .

8. A sphere has a volume of $2,304\pi$ mm³. Find the diameter of the sphere.

VOLUME UNIT OVERVIEW

STANDARDS

8.G.9 Know the formulas for the volumes of cones, cylinders, and spheres and use them to solve real-world and mathematical problems.

BIG IDEAS

- Formulas can be used to find the volume of cones, cylinders and spheres, and calculating volume can help us solve both mathematical and real-world problems.

VOLUME UNIT PACING GUIDE

Student Handout 1 Homework 1	Student Handout 2 Homework 2			
DAY 6	DAY 7			
Volume Study Guide	Volume Test			
Review	Test			

ESSENTIAL QUESTIONS

- What is meant by the volume?
- How are the volumes of cones, cylinders, and spheres related?
- What are the different variables that represent volume?
- How is finding the volume of a cone, cylinder, or sphere similar to finding the area of a circle or rectangle?

VOLUME UNIT OVERVIEW

TOPIC	TEACHING TIPS
Volume of Cylinders	<ul style="list-style-type: none">I like to help students visualize the volume formula by showing a stack of coins (or another circular item) to demonstrate that the volume of the stack is equal to the area of one coin multiplied by the height of the stack. A sleeve of circular crackers would also be a great visual.
Volume of Cones	<ul style="list-style-type: none">Take a cylinder and a cone with the same sized base and same height, and have students predict how many of the cones would fit inside the cylinder. Then, demonstrate by filling the cone with rice (or another substance) and pouring it into the cylinder three times.
Volume of Spheres	<ul style="list-style-type: none">Visit http://kera.pbslearningmedia.org and search "Comparing Volumes of Cylinders, Spheres and Cones." This interactive tool will allow students to see the relationship between the volume of a sphere and a cylinder with the same height and radius. (You can also select "Cone" to show the relationship between the volume of a cone and cylinder with the same height and radius).
Using the Formulas	<ul style="list-style-type: none">This unit will involve a lot of formulas, and hopefully showing work! Vary the practice by allowing the students to use dry erase markers every now and then.It can be hard for students to remember that "B" in the formula requires an extra step of calculating the area of the base. I like to tell students that a capital letter in the formula usually means that there will be work involved to find it.

Mini-Quiz 1

Name _____
Date _____ Pd _____

VOLUME OF CYLINDERS AND CONES MINI-QUIZ

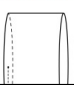

Solve each of the problems below. Round solutions to the nearest tenth when necessary.

1. Find the volume of the cone.

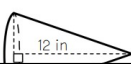

$r = 6$ cm

2. Find the volume of the cylinder.

$d = 8$ in

3. Find the volume of the cone.

$d = 8$ in

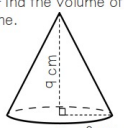

4. A cylinder has a volume of 198 cm^3 , and its base has an area of 22 cm^2 . What is the height of the cylinder?

Unit: Volume
Mini-Quiz 1

VOLUME OF CYLINDERS AND CONES MINI-QUIZ

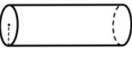

Solve each of the problems below. Round solutions to the nearest tenth when necessary.

1. Find the volume of the cone.

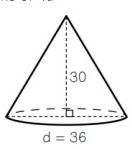

$r = 6$ cm

2. Find the volume of the cylinder.

$r = 8$ mm

3. Find the volume of the cone.

$d = 36$

4. A cylinder has a volume of 198 cm^3 , and its base has an area of 22 cm^2 . What is the height of the cylinder?

Unit: Volume

VOLUME STUDY GUIDE

Solve each of the problems below. Be sure to ask questions if you need more help with a topic.

I CAN USE A FORMULA TO FIND THE VOLUME OF CYLINDERS.

1. What is the formula used to find the volume of a cylinder? Describe the steps to find the volume of a cylinder in your own words.

2. Find the volume of the cylinder. Leave your answer in terms of π .

$r = 8$ mm

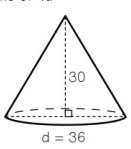

3. Find the volume of the cylinder.

4. Find the volume of the cylinder.

I CAN USE A FORMULA TO FIND THE VOLUME OF CONES.

5. Laura is trying to find the volume of a cone. So far, she has found the area of the base of the cone and multiplied it by the height of the cone. Describe what she needs to do to find the volume of the cone.

7. Find the volume of the cone in terms of π .

$d = 36$

8. Find the volume of the cone.
